

Maker Of **The Safety Sleeper™**

## **A SAFE, FULLY ENCLOSED AND PORTABLE BED SYSTEM FOR CHILDREN AND ADULTS WITH SPECIAL NEEDS**

### **Q: Who was The Safety Sleeper developed for?**

**A:** Anyone living with a diagnosis that affects sleep or having a night-time sleep schedule.

### **Q: What are some diagnoses that benefit from The Safety Sleeper?**

**A:** Alzheimer's Disease, Angelman's Syndrome, Autism, Brain Injury, Cerebral Palsy, Dementia, Down Syndrome, Epilepsy, Genetic Disorder, Mitochondrial Disease, Sleepwalking, Smith Magenis Syndrome (SMS).

### **Q: What are some of the dangers that surround these diagnoses during sleep?**

**A:** Wandering at night, elopement, falling out of bed during seizures, night tantrums, head banging, inability to self-soothe due to over-stimulation; hurting self, damaging the home or causing fires due to inability to discern safety issues.

There is also the danger of children ingesting dangerous items such as small toys or cleaning products and accessing dangerous items such as microwave and sharp objects like silverware, while the rest of the family is asleep.

### **Q: How does The Safety Sleeper compare in price and value?**

**A:** Less than \$4,000, The Safety Sleeper is the most affordable bed on the market against comparable bed systems. Lower priced options exist, but they do not offer long lasting durability and protection and are meant for only small children. Other more comparable beds range in cost from \$4,000 – \$12,000.

### **Q: How does The Safety Sleeper protect people living with a special needs diagnosis?**

**A:** The Safety Sleeper was developed with specific features to make sleeping more comfortable, safe and secure and is customizable to support specific diagnosis.

# THE SAFETY SLEEPER FEATURES

---

**CUSTOMIZABLE:** The Safety Sleeper is not a “one size fits all” bed solution for those living with special needs. We provide custom solutions to make our bed system the most comfortable and secure solution it can be for our customers.

**FULLY ENCLOSED:** Because The Safety Sleeper is a fully enclosed bed system, concerns of night wandering are completely eliminated.

**ZIPPER LOCKING MECHANISM:** The zipper locking system provides extra safety at each entrance. The hook and loop systems, ensures the loved one cannot accidentally open the enclosed bed and fall into a dangerous situation.

**DURABLE MATERIALS:** The Safety Sleeper is developed with durable materials that stand up against melt-downs, jumping, pulling, pushing and continued use. The developers understand the difficulty The Safety Sleeper users face when trying to sleep and this bed system meets all of the needs to support their efforts to fall asleep and stay asleep.

**SAFE AND SECURE:** The Safety Sleeper comes with many safety features and has additional safety feature accessories as well.

- A Coverlet is included which zips around the whole base of the bed to eliminate any entrapment issues during a seizure or night time tantrums.
- Frame Pads are available for those who know their loved one struggles with aggressive behavior when trying to calm him/herself for bed.
- Webbing behind the zipper provides additional security from little fingers reaching the zipper system.
- Fire Retardant materials add an additional level of security.

**PORTABILITY:** Traveling with someone living with a special needs diagnosis can be difficult and frequently, often times families avoid traveling all together. The Safety Sleeper bed system is portable and packs up into a secure hard shell case for easy storage and traveling. This bed system allows users to bring the comfort and familiarity of home with them wherever they go, making night-time away comfortable, safe and secure.

**INDIVIDUAL COLOR CHOICES:** The Safety Sleeper team understands that People are created uniquely with personalities ranging from adventurous, bright, calm, creative, dynamic, energetic, and gentle. This is why we offer customized colors so that the bed can represent your customer’s personality.
